

# UNIQUE CONSTRUCTION FEATURES

## Set Loki Nets Apart

When it comes to building nets, we try to keep things simple. We design our nets to do two things – catch fish and last a long time. No gimmicks or fads – just practical and durable products that perform exactly as they're designed.

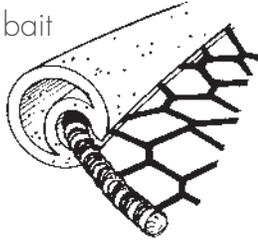

### 1 100% U.S. MADE KNOTLESS NETTING

All Loki netting is made in our plant in Knoxville, Tenn., from 100% nylon under strict quality control conditions. The knotless netting reduces abrasion to the fish, is more durable and also absorbs preservative treatment better than knotted nets.

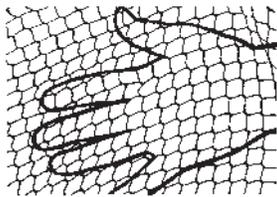

### 2 MONORAIL™ SYSTEM

The original mesh-guard system, Loki's Monorail aluminum bow is used in many of our small mesh dip nets (shad, smelt, trout, bait dealer and others). Monorail prevents netting abrasion from bait tanks, rocks and sand. The net itself is encased in the bow, creating a natural guard and attractive appearance.

### 3 TANGLE-LESS™ & TECHNET™ LANDING NETS

Introduced in 1984, our Tangle-Less line has spawned many cheap imitations over the years, but none comes close to the original. TechNet features Tangle-Less coating with a larger mesh opening and deeper net bag. The result is a net with more body that greatly reduces tangling.

### 4 STRONG CONNECTOR BLOCKS & FITTINGS

One-piece solid aluminum connector blocks are used on all sliding handle nets. Stainless steel screws and springs are on all Tangle-Less and TechNet models.

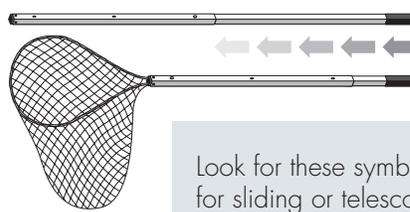

### 5 HANDLE OPTIONS

Fiberglass, aluminum and wooden handles are options on many Loki nets, along with square and round telescoping models.

#### SLIDING HANDLES (SH)

#### TELESCOPING HANDLES (TH)

Look for these symbols for sliding or telescoping handle options

**LOKI NETS are 100% made in the USA**

With the exception of our Promo line, all Loki Nets and components are 100% manufactured in the USA from American-made components.
